Title of Invention: CODING DATA MANAGEMENT DEVICE

Publication No.: Japanese Patent Appln. Laid-open Hei 8 No.45249

Publication Date: February 16, 1996

Application No.: Japanese Patent Appln. Hei 6 No.179000

Application Date: July 29, 1994

Applicant: Sharp corp

[0099]

[Effect of the Invention]

(1) Stored as a management data is the recording positional information with respect to the video coded data, audio coded data, and multiplex coded data corresponding to the key frame on the recording medium. Therefore, at the time of reproduction accompanying the random access, the position of the key frame accessed on the recorded medium can be understood. Accordingly, unnecessary data are not read out at the time of random access, and high-speed random access becomes possible.
